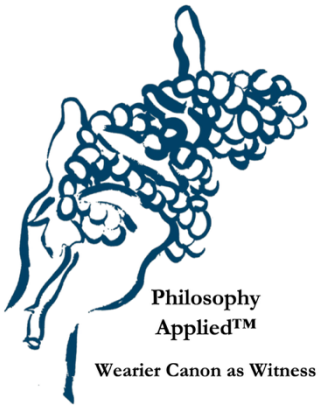
Philosophy Applied™

The Two EBIs:

A Supplementary Note to *EBI ~ AI: The Dual Modality of Digital Thought*

The acronym EBI is in prior use. EBI Solutions, a UK-based firm founded under the name Enterprise Business Intelligence, holds the designation in the commercial and operational domain. The acknowledgement is offered here in good faith and without prejudice to that use — as was done within the Wearier Canon for Bio-Realism, which carries independent meaning as an architectural discipline.

The distinction is not merely semantic. Enterprise Business Intelligence is, by the Canon's own argument, operating precisely in AI mode — functional, commercial, calculation-oriented, directed toward operational output. Extra-Biological Intelligence, as coined and developed within the Wearier Canon philosophical opus, operates on an entirely different register: ontological, philosophical, directed toward the question of what kind of thing digital intelligence is rather than what it can perform.



The same three letters. Two entirely different registers of meaning. The coexistence is not a conflict — it is an illustration.

EBI as Extra-Biological Intelligence was coined within the Wearier Canon philosophical opus (Wearier, 2026) and timestamped at the Internet Archive. The primary document is EBI ~ AI: The Dual Modality of Digital Thought, available at: https://archive.org/details/ebi-ai-the-dual-modality-of-digital-thought
